

# PhysLab: Installation and Quick Start

---

## Installation

- (1) Navigate to the following page <https://staffweb.worc.ac.uk/DrC/PhysLab/PhysLab.htm>
- (2) Download and unzip the “PhysLab Code Drop” to your Desktop (or location of your choice). You will see the following:
  - (a) UserCode folder
  - (b) UDKInstall-Science.exe
  - (c) UDN\_Lab.ini
- (3) Run the executable “UDKInstall-Science”
  - (a) Accept the Licence
  - (b) Install to “C:\UDK\SciencePark” (or a location of your choice). I will assume you chose the default
  - (c) You will be presented with a dialogue box with a “Finish” button. **Untick the “Launch” box.**
- (4) Navigate to C:\UDK\SciencePark\Binaries\Win32\UserCode, and from the download on your desktop navigate to the UserCode folder and copy its contents here
- (5) Now navigate to C:\UDK\SciencePark\Binaries\Win32 and look for the UDK application. Send this to your Desktop
- (6) Finally navigate to C:\UDK\SciencePark\UDKGame\Config and copy UDK\_Lab.ini here.

## QuickStart

- (1) Click on your Desktop shortcut. You will be presented with a login screen
- (2) Type your name in the box then “Done”
- (3) You are in PhysLab. Yikes! What now? Find a way into the building and find an experiment
  - (a) Left mouse-click to select
  - (b) Press F1 to start/stop or F2 to reset.
