

Notes on the Enhanced Engine 25-02-23

Each pedestrian now dumps an Octave data file which will make a plot when run. If you have 4 pedestrians then you will get **Ped0.m**, **Ped1.m**, **Ped2.m** and **Ped3.m** in the folder **OctaveFiles**.

To get all plots together, do the following at Octave command line:

```
>> clear all
```

```
>> Ped0
```

```
>> hold on
```

```
>> Ped1
```

```
>> Ped2
```

```
>> Ped3
```

To get a plot with equal scaling on its axes then do this

```
>> axis('equal')
```

Finally release the drawing hold

```
>> hold off
```

Here's a typical plot,
